Subject: :: Video tutorials for CiviCRM

Ever feel a little overwhelmed by some feature in CiviCRM?

If you haven't yet, you probably will. There's a lot of wonderful, complex stuff in there.

Video tutorials might help.

Sure, no off-the-shelf training program is going to tell you exactly everything you need to know in every situation.

But for getting a good understanding of the concept, and of how a set of features is *intended* to work, video can be a great format. It's usually *much* more easily absorbed than written documentation.

If you agree, you should check out CiviAcademy, a new offering from the creators of CiviCRM, which they call…

Bite-sized tutorials to help you maximize CiviCRM.

Easy to understand video tutorials that will take you from an absolute newbie to a CiviNinja in no time!

… high-level, fast-paced instruction designed for users of CiviCRM … showcasing major features and common customizations.

I've mentioned this before, and have been excitedly awaiting its release.

Well, now it's here.

Give it a look, and consider where it might help you and your team master this robust set of CRM functionality.

All the best,
A.
